Level 2 Intermediate Apprenticeship in Warehousing and Storage
Who is the course aimed at?

This course is aimed at people who work for a minimum of 16 hours per week and work in a warehousing and storage environment.

As a Warehousing and Storage apprentice, you might learn skills in operating specialist machinery to get things onto – and down from high storage spaces; learn about keeping some goods at low temperatures; and improve your spatial awareness, so that you can quickly and efficiently load objects of different shapes and sizes.

Job Prospects

- Warehouse operative
- Forklift driver
What to expect...

You will cover aspects including the operation of specialist machinery, specific storage requirements and health and safety issues.

This is on top of transferable skills in communication, teamwork and administrative skills in the working environment.

Your duties will depend on your employer, but you could manage stock; audit inventory; keep equipment in good working order; process returned goods; or manage the receipt, storage and dispatch of goods.

You might even learn how to maintain the safety of hazardous goods and materials. Good teamwork is important when you’re working to a tight schedule, such as loading or unloading a lorry that can only wait for a little while before it needs to go on to the next job.
